EXPERIENCE

Career Institute, Faisalabad Pakistan, *Senior Software Engineer*

October 2021 - Present

Career Institute educates and trains students in areas such as Graphic Designing, SEO, and web development etc.Here is the list of my contributions at Career Institute:

- Improved legacy code, refactored and introduced JavaScript in the frontend
- Maintaining the frontend of the institute's main website
- Making frontend templates using HTML/CSS and JavaScript
- Getting feedback from clients and incorporating that

Keywords – *In no particular order*
Git, JavaScript, HTML5, CSS3, Bootstrap 4, Bootstrap 5, MySQL, React.js

BWS (Business Workforce Solutions), Lahore Pakistan, *Junior Software Engineer*

July 2021 - September 2021

BWS covers everything from software development and BPO to finance and accounts and telecom support, I joined BWS in July 2021 and worked in a cross platform team. I was one of the pre-launch early hires and was a contributor to most of the services that we had. I introduced a lot of tools to my colleagues which helped them in their day to day job. My **key contributions** in Digital Softs are listed below:

- Worked with several clients on preparing HTML/CSS/Bootstrap templates
- Helped create starter kits for frontend (Bootstrap, Tailwind CSS)
- Created almost ~100 frontend templates
- Meeting with clients to gather the requirements, get feedback on the templates

Keywords – *In no particular order*
Git, JavaScript, HTML5, CSS3, Bootstrap 4, Bootstrap 5, MySQL

Digital Softs, Faisalabad Pakistan, *Internee*

January 2021 - May 2021

Working in an agile team, I joined Digital softs in January 2021 and have been a key contributor to some of the key projects. My current responsibilities include development of new features, maintenance of existing features, doing code reviews and collaborating with the product team in making sure that we build the right features. My **key contributions** in Digital Softs are listed below:

- Rebuilding the websites search with better performance
- Meeting with clients to gather the requirements, get feedback on the templates
- Also contributed to several other internal projects

Keywords – *In no particular order*
HTML5, CSS3, Bootstrap 4, Bootstrap 5, JavaScript, MySQL, Git
